

Privacy Policy - WebGroupWest.com Site Visitors

(Updated February 25, 2019)

Your privacy is very important to us, so we implemented this Policy to help you understand how our site uses your information:

- Our site uses the industry-standard HTTPS protocol. What you type is reasonably well-encrypted in-transit to our server (and vice-versa).
- Like almost all web sites, Ours utilizes third-party services. For example, we use Google Analytics, so we can see which of our pages interest visitors the most.
- Unless you use our forms, we never ask for any of your personal information.
- If you *do* use our “Contact Us” forms, your submission is sent directly into our email system, which operates on Google’s infrastructure, via their [G Suite business platform](#).
- If you choose to sign-up for one of our mailing lists, your submission is sent directly into our mailing list provider, [MailChimp](#).

We are committed to operating this site ethically.

This privacy policy may change over time, so please check back if you have any concerns.

In addition to this Privacy Policy for visitors to our site, we have an additional [Privacy Policy For WebGroupWest Clients](#).
